

# RTD®

## Dispensing System Accessories

Provides optimal use of the RTD® System through easy-to-install and wall-mountable product baskets/holster and quick and easy-to-use water hook-up connections.

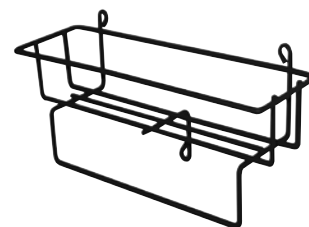

### Wall Holster

- Holds either 1.5 or 5 L RTD® bottles for simple and easy one-handed spray bottle, bucket or auto scrubber filling
- Easy to install with only three screws
- Does not require permanent plumbing installations
- Keeps containers and hoses off the floor
- Uses RTD® portable packaging in the convenience of a wall-mounted dispenser

### 1.5 L/5 L Wire Baskets

- Convenient accessory for holding RTD® bottles
- Each basket holds two RTD® bottles of intended size
- Wall-mountable

### 5 L Hanging Basket

- Holds 5 L RTD® bottles
- Wall-mountable

### Water Hook-Up Kit

- Provides easy-to-use hook-up for the RTD® System
- Everything you need to quickly and easily connect to a water source
- Includes an instruction sheet, 5 ft. water hose, Y-connector, shut-off valve and female quick connect
- RTD® Quick Connect Kits are available in 12 packs or 1 packs to suit customer needs
- Heavy Duty Kits are less likely to break and much more robust so they last longer and can better handle water, heat and rigorous field use
- Ergonomic and drop resistant

### Quick Connect

- Easily connects and disconnects RTD® bottles from water supply
- The new quick connect has been developed in order to handle more severe field applications

### Water Supply Hose

- Durable, 5 ft. water supply hose for use only with RTD® chemical package
- Ability to handle extended operating time which often occurs with spray applications
- Features a high heat and high water pressure specification operating range. The hose is labeled NSF51 compliant.

### Use Overview

RTD® Dispensing System Accessories provide optimal use of the RTD® System through easy-to-install wall-mountable product basket/holsters as well as the quick and easy-to-use water hook-up connections. The RTD dispensing system is the most significant innovation in the history of cleaning chemical dispensing. A true industry game changer that made chemical dispensing easier, faster, safer and more cost effective. A small super concentrated cleaning chemical that integrates the dispensing system with the chemical packaging. RTD is portable, spill-tite, easy to use, and very cost effective.
