

# Suma OptiFill Manual Warewashing System

## Quick overview

Prepared Sep 23, 2025

### Reduces waste

- Super concentrate (1:2500) produces about 1600 gallons (6055 liters) of usable solution.
- Bottle is 100% recyclable and manufactured from 25% post-consumer recycled materials.

### Minimizes kitchen clutter

- Portable system for any kitchen; one unit can service multiple sinks.
- No hoses or wall-mounted fixtures, so it will not harbor germs or add clutter.

### Accurate dosing and dispensing

- Volumetric technology dispenses detergent or sanitizer based on faucet water flow.
- Helps reduce re-washing and ensures the correct sanitizer PPM level.

### Safe to handle

- Lightweight, non-slip design for easy portability.
- Tamper-proof, spill-tight packaging helps prevent accidental spillage or misuse.

### Maintenance-free and failsafe

- Patented pumping mechanism starts and stops automatically with water flow.
- Requires no set up.

### Easy to use

- Set the unit on the sink divider, align the faucet, turn on water, and go.
- Store it away when finished.

Note: Always follow the product label and SDS for detailed directions, PPE and safety information.
